NEW YORK COTTON,

NEW YORK, Jan 13-A full response to higher Laverpool cables was provented by overnight selling orders in the cotton market at the opening today. First prices were unchanged to 25 points higher, and the more active months sold about 19 to 25 points show last night's closing after the call with March touching 38 48, and July 35 50. It spite of the relative Liverpool strength, there was very little buying from that source, however, and the market here soon turned castering liquidation, a little Southern and more active Wall street selling, which probably reflected uncertainty over money rates. March declined to 35 21c and July to 33,32c before the end of the first hour.

New York—Crude oil continued firm at about the 20-cent basis. Leading orokers reported no change in the crude situation. The selling of crude, they state, is checked by the scarcity of tank cars. Some of the leading local traders are on both sides of the market at present. Some point to the strength in lard, vegetable oils and the prospects of government financing of exports, while others contend the market is overbought and that a reaction is in order. They also contend that export buying has been disappointing. Tenders yesterday were 400 barrels and deliveries to date are 3,700 barrels.—McFadden to McFaill.

New York—There was one outstanding feature to the entire market, however, and that was the action of I nited State Steel common. In some quarters the impression prevails that the increase of 1.137,000 tons in orders was due to reduced shipments as a result of the steel strike. Such conditions instance been respeciable for the gait reported in November, but it is hardly likely to have been the case in December, as statements inade by steel trade papers world indicate, as it had been stated all along that the demand for steel products was constantly increasing and the steel corporation during the past month was more willing to accept new orders than it was while the strike was in progress—Post.

New York—The high price of money was the most easily given explanation of the worders. New York—The high price of money was the most easily given explanation of the weakness of the stock market yesterday, and undoubtedly it was one of the teasons for the decline. There seemed to be something more behind the manifest lack of faith in the future than the price of call money for the day and the hour. The unsettled situation on the other side is a matter that the ling people can not lose sight of the Const learner of the course of the contemplated strike is expected to take place in Italy this week and a general strike is expected to take place in Italy this week and a general strike is being platined in England.
